

# F3B Hohenstoffeln-Pokal 2025

## Airfield and it's infastructure

- We had to adjust the layout compared to previous years in order to manage the difficult conditions in some areas of the airfield. This also means that we have a bit less space available.
- As it is still wet in some places make sure to bring the right footwear with you
- Cars may drive down to the hangar in order to unload. Please never ever drive beyond the barriers and please park your car on the parking area after unloading.
- Campers and other heavy vehicles may not drive down to the airfield. Please park them on the parking area.
- In case you would like to sleep in your tent, please use the designated camping area
- Toilets and Shower are available

## Contest

### General Information

- Flight restriction above Hangar: Please do not cross this area below 30 meters over ground.
- Final landing in duration, distance and speed has to take place north of the safety area.
- Starting lists as well as your slots on the winchline are attached to this E-Mail.

### Duration

- Working Time: 12minutes

### Distance

- Working Time: 7 minutes

- We are flying on the north side of Safety Area

## Speed

- Working Time: 3 minutes, seamless mode

I am looking forward to meet you soon.

Cheers,

Thomas
